

WALL FINISHES

WALL FINISHES

Resin Surfaces Limited (RSL) manufacture a comprehensive range of resin based wall finishes, designed for durability and ease of cleaning.

● Resuseal Wall Gloss

Resuseal Wall Gloss is a two-part, water-based, durable epoxy resin wall coating formulated for application in food preparation, laboratory and clean room environments and other areas of maximum hygiene, such as operating theatres, breweries and custody suites.

Resuseal Wall Gloss provides an attractive gloss finish whilst providing excellent resistance to light chemical attack and does not support fungal or bacterial growth.

● Resuseal Wall Ex

Resuseal Wall Ex is a high solids epoxy wall coating which has improved opacity and hiding power through its high film build. Resuseal Wall Ex will provide a durable, satin finish for environments where cleanliness and hygiene are of high importance, such as, Mortuaries, Commercial Kitchens and Washrooms.

Resuseal Wall Ex has excellent chemical resistance to light chemical attack and does not support fungal or bacterial growth.

● Ecuclad

Ecuclad is a heavy-duty reinforced wall lining which has been developed to meet the stringent requirements of hygienic and clean environments subject to aggressive physical, chemical and thermal conditions.

Ecuclad provides an effective joint free system which is more cost effective than preformed panels and is also easy to clean. It has high resistance to damage, temperature extremes and chemical spillage. Ecuclad systems are flexible, enabling design specifications for special requirements regarding weight of reinforcement and finished top coats.

The complete range of versatile, high performance wall systems meet the demanding requirements of virtually every industry, including food processing, healthcare, pharmaceuticals, engineering and public areas such as washrooms.

All products are produced to ISO9001 with committed quality and service, backed by nationwide representation and a dedicated technical department. A national network of registered contractors is available if required, skilled in the application of all our products.

Benefits Include:

- Seamless
- Impervious
- Low odour
- High chemical resistance
- Attractive range of colours
- Satin or gloss finishes
- Durable
- Easily applied
- Anti graffiti
- Steam –cleanable
- Fungicidal
- Insecticidal
- Impact resistant
- Hygienic
- Aseptic

● Ecuseal

Ecuseal is a high performance elastomeric roof and wall coating. Its co-polymer emulsion compound formulation produces a technically advanced and convenient system for waterproofing a variety of internal and external surfaces including all types of pitched roofs etc.

In addition to its excellent waterproofing properties, Ecuseal is ideal for exterior application on walls, providing protection against concrete carbonation.

● Resutile Wall

Resutile is a high grade, two-pack, hard wearing polyurethane wall coating designed for maximum chemical resistance which is light-fast and flexible. Resutile has good impact and abrasion resistance.

The system is resistant to high temperatures up to 150°C. Suitable for both interior and exterior applications. Resutile provides a high grade anti graffiti coating. Available in gloss and matt grades.

● Resupen WB Wall

Two pack, water based light-fast polyurethane resin coating with a clean bright UV stable white finish. Resistant to hot water and general chemical attack.

● Resuflake

Seamless decorative wall finish incorporating coloured plastic flakes embedded onto epoxy resin and sealed in clear polyurethane, available in a range of attractive multi-coloured finishes.

A variety of primers are available which allow the application of all the above products onto plaster, concrete, wood, metal, brick and breezeblock.
