

General information

SPORTEC® purcolor is the ideal flooring for offices, retail and outlets and other frequently used rooms. Thanks to its strong colours, it can be perfectly matched to the interior design, while offering effective impact and room noise and improved walking comfort. Other reasons that speak for **SPORTEC® purcolor** are the easy installation and cleaning of the floor covering.

Preventative Measures

Keep as much dirt and foreign material as possible off the floor surface by including "dirt stops" in front of the doors and "shoe cleaning zones" or "shoe changing zones" in the entrance areas.

Cleaning

Clean off loose dust and dirt by using a high-performance vacuum cleaner. Optionally use a vacuum cleaner with rotating brush attachments or other fittings to supporting the vacuum cleaner. Remove clinging dirt with a lightly spray-wetted cloth.

Remove more stubborn stains as follows:

Wet stain with a solution made up of water with a dash of liquid soap (e.g. dishwashing detergent) and rub with the lightly spray-wetted cloth over the stain. Rinse with clear water and dry. An alternative "wet cleaning" method: an automatic cleaning machine with a rotating brush and integrated water draw-off.

Alternative to this it is possible to use a commercially available wet-vacuum cleaning machine or any other suitable wet cleaning machine.

SPORTEC® purcolor floors have a porous surface which can absorb liquids. If these liquids are not dried away, mold formation or odors can result. To prevent absorption of liquids, we recommend to apply a 2-component PU waterproof sealing compound (e.g. RZ turbo protect zero) coating on the installed floor covering with a suitable coating roller. The adapted coating material can be delivered with the ordered floor covering material directly from our company.

Please contact our Applications Engineering Department in the case you should have questions or need further technical information.
