

General information

SPORTEC® splash offers the same outstanding properties and application options as **SPORTEC® color**. It is a rugged, easy-to-clean and water-repellent floor covering material for use in fitness and gym facilities, retail outlets, exhibition halls, equipment storage rooms and ice sports stadiums. Thanks to the incorporation of large and small EPDM colour granules, **SPORTEC® splash** floor coverings are available in an even greater range of colours and finishes. **SPORTEC® splash** makes your rooms not only very attractive, but also safe and comfortable.

Preventative Measures

Keep as much dirt and foreign material as possible off the floor surface by including "dirt stops" in front of the doors and "shoe cleaning zones" or "shoe changing zones" in the entrance areas.

Cleaning

Clean off loose dust and dirt by using a high-performance vacuum cleaner. Optionally use a vacuum cleaner with rotating brush attachments or other fittings to supporting the vacuum cleaner. Remove clinging dirt with a lightly spray-wetted cloth.

Remove more stubborn stains as follows:

Wet stain with a solution made up of water with a dash of liquid soap (e.g. dishwashing detergent) and rub with the lightly spray-wetted cloth over the stain. Rinse with clear water and dry. An alternative "wet cleaning" method: an automatic cleaning machine with a rotating brush and integrated water draw-off.

Alternative to this it is possible to use a commercially available wet-vacuum cleaning machine or any other suitable wet cleaning machine.

SPORTEC® splash floors have a porous surface which can absorb liquids. If these liquids are not dried away, mold formation or odors can result. To prevent absorption of liquids, we recommend to apply a 2-component PU waterproof sealing compound (e.g. RZ turbo protect zero) coating on the installed floor covering with a suitable coating roller. The adapted coating material can be delivered with the ordered floor covering material directly from our company.

Please contact our Applications Engineering Department in the case you should have questions or need further technical information.
