## Product Information

### Description

FS705 is a graphite based product which when exposed to fire expands protecting penetrations including cables, cable bunches, cable trays, plastic and metallic pipes. FS705 maintains the integrity and insulation performance of the seal through masonry and plasterboard.

### Usage / Purpose

FS705 is designed to close off gaps and penetrations in compartment walls and floors, to provide up to 2 hours fire resistance. This product has been formulated to close off plastic pipe penetrations in the event of a fire, negating the need for pipe closers or wrap systems. FS705 is suitable for the following service penetrations up to 125 mm; PVC pipes, ABS pipes, HDPE pipes including Armaflex and glass wool insulation. FS705 can also be used with metallic pipes, cables and cable bunches including telecommunication cables, cable trays and cable ladders.

### Colour

Grey

### Packaging

310 ml cartridges (12 per box)

### Availability

Direct from tremco illbruck (see back of leaflet for address and telephone details).

## USAGE GUIDELINES

### Necessary Tools

Skeleton/sausage gun, palette knife and spatula.

### Preparation

- Ensure that the substrate and penetrating services are compatible with FS705, and that site conditions are within specification. Check that sufficient annular space is available to allow correct installation.
- Clean all surfaces of loose particles, moisture, oils, grease and corrosive materials. We recommend that the surface or substrate temperature be 5°C or above at the time of application. Contact Technical Services for advice regarding lower temperature application.

### Application

- Mineral wool (min. 80 kg/m<sup>3</sup>) or PE backing rod can be used as a backer where and if required. Backing material is not required to achieve a correctly installed seal. FS705 should be applied around the service on both exposed faces as per the tables as shown in the performance data tables.

### Installation guide

Up to 75 mm pipe = 10 mm annular gap around the pipe minimum.

Over 75 mm pipe = 1/8 of pipe Ø Depth to be 25 mm minimum.

i.e. 110 mm pipe Ø divided 8 = 14 mm annular gap x 25 mm depth

- A circular motion is recommended when installing the sealant to fill the required gap. FS705 can be easily built up to effectively fill the annular space with very little wastage or slump. Using a sharp knife, cut nozzle of cartridge or sausage to bead size and angle required. Gun sealant into gap to required depth by applying an even pressure to the trigger. Tool to a smooth finish immediately with a wet palette knife or spatula.

NOTE: If FS705 is exposed to elevated levels of moisture before fully cured, it is likely to be damaged. It is recommended that contact with moisture or condensation during the application and drying of FS705 should be avoided.

### Maintenance

No maintenance required after installation. Routine inspection recommended to ensure no damage.

### Storage

Store between +5°C and +25°C in dry conditions. Keep away from sources of ignition.

### Shelf Life

18 months in unopened and stored as indicated.

### Health & Safety Precautions

Safety data sheet must be read and understood before use.

## Intumescent Sealant

### Key Benefits Summary

- Certified to the latest European standards EN 1366-3 and EN1366-4, Classified to EN 13501-2:2007, CE Marked to ETAG-026
- Up to 120 minutes fire resistance
- Air permeability testing to 600 Pa
- Acoustics up to 63 dB
- Can be used in FB747-50 Batt
- Tested with combustible pipes up to 125 mm
- Tested for use in linear gaps up to 20 mm
- Tested with metallic pipes, cables, cable bunches, cable trays and cable ladders

### Technical information

Property	Test Method	Result
Description and Colour		Aqueous Thixotropic Paste - Grey
Density		1.3 g/cm <sup>3</sup>
Viscosity		Thixotropic
Application Temperature		+5°C to 35°C
Flash Point		N/A
Skin time		15 minutes @ 25°C/ 50% RH
Cure Time		1.7 mm per 24 hrs
Shore Hardness A		68- ISO 7619-1:2010
pH		8 - 9
Expansion Onset Temperature		180°C
Expansion		Up to 20 times
VOC		18 g/l equivalently 1.2% by weight
Air Permeability		600Pa EN1026- 100Pa 11.1/16.7 m <sup>3</sup> /h/m <sup>2</sup>
Sound	EN10140:2-2010	up to 63 dB

### Performance data

Fire performance in accordance with EN1366-3, EN1366-4, Classification 13501 2:2007 + A1: 2009, ETAG-026, Air Permeability EN1026, Sound EN10140:2-2010. Fire resistance classifications: The following fire protection classes are used: E = integrity, i.e. ability to isolate smoke gases, I = insulation, i.e. ability to prevent heat spread, C = Capped inside furnace, U = Uncapped outside of furnace or U = Uncapped inside of furnace, C = Capped outside of furnace

#### FS705 Penetration Seals Flexible or rigid walls 100 mm thick. FS705 20 mm annulus x 25 mm depth no backing material required.

PVC Pipe ø 40 mm with 1.9 mm wall thickness.	E120 C/U
PVC Pipe ø 125 mm with 9.2 mm wall thickness.	EI60 C/U
ABS Pipe ø 40 mm with 1.9 mm wall thickness.	E120 C/U
HDPE Pipe ø 40 mm with 2.0 mm wall thickness.	E120 C/U

#### FS705 Penetration Seals flexible or rigid walls 100 mm with insulated plastic pipes.

Copper/Steel Pipe ø 40 mm with 1.5 mm to 14.2 mm wall thickness insulated with 32 mm Armaflex.	E120 C/U
	EI30 C/U
Copper/Steel Pipe ø 40 mm-159 mm with 2.0 mm to 14.2 mm wall thickness insulated with 32 mm Armaflex.	E120 C/U
	EI30 C/U
Copper/Steel Pipe ø 159 mm with 2.0 mm to 14.2 mm wall thickness insulated with 30 mm x 80 kg/m <sup>3</sup> 'pipeline' SGR glass wool tube.	E120 C/U
	EI30 C/U

#### FS705 Penetration Seals flexible or rigid walls 120 mm thick. Installed on both faces.

PVC Pipe ø 40 mm with 1.9 mm – 3 mm wall thickness 10 mm annulus x 25 mm deep with no backing material.	E120 C/U
PVC Pipe ø 125 mm with 4.8 mm – 7.4 mm wall thickness 16 mm annulus x 25 mm deep with 30 mm deep 80 kg/m <sup>3</sup> backing material.	E120 C/U
HDPE Pipe ø 63 mm with 7.2 mm wall thickness 300 mm x 100 mm x 25 mm deep, cables up to ø 21 mm with no backing material.	E120 C/U
HDPE Pipe ø 90 mm with 9.2 mm wall thickness, 12.5 mm annulus x 25 mm deep with no backing material.	E120 C/U
ABS Pipe ø 90 mm with 6.0 mm wall thickness, 12.5 mm annulus x 25 mm deep with no backing material.	E120 C/U
