

## Well-proven with tens of millions of square metres already successfully installed worldwide

**RESITRIX® SK Partial Bond** is a heat weldable and glass- reinforced, composite rubber membrane with an EPDM core. The underside is partially coated with self-adhesive polymer modified bitumen, with a release film.

- / Life expectancy of many decades
- / Single layer application
- / Fully elastic and highly flexible down to -30°C
- / No Shattering- Effect
- / Resistant to the effects of ozone, UV and infrared radiation without additional surface protection
- / Resistant to a wide range of environmental chemicals and atmospheric emissions
- / Compatible with bitumen
- / Contains no chlorine or plasticisers
- / Highly slip resistant even when wet
- / No shrinkage throughout the entire service life
- / Recyclable
- / CE certification according to ETA-06/0174 and DIN EN 13967
- / BBA certificate No 06/4329

## Variable application methods:

- / Fully primed surface using FG 35 primer
- / Partly primed surface using FG 35 primer
- / Partially bonded without FG 35 primer, where the substrate consists of a fresh coating of bitumen

Thanks to the partially coated self-adhesive underside, **RESITRIX®** SK Partial Bond allows permanent vapour pressure dissipation. RESITRIX® SK Partial Bond is therefore particularly advantageous for substrates that are prone to movement or which contain residual moisture.

Please consult the RESITRIX® planning guidelines and the **RESITRIX®** technical department for detailing and application instructions.

Material Properties			
Thickness:	2,5mm ± 10%	Widths:	1000mm
Weight per unit area:	ca. 2,75 kg/m²		(333mm, 500mm and 666mm possible)
Length:	10m	Shelf life:	12 months in originally packed state

Physical values			
Test criterion	Required value		Actual value
Tensile strength to DIN EN 12311–2	longitudinal: transverse:	≥ 250 N/50 mm ≥ 200 N/50 mm	361 N/50 mm 333 N/50 mm
Elongation at break to DIN EN 12311-2	longitudinal: transverse:	≥ 300% ≥ 300%	600% 600%
Dimensional stability after 6 hours at 80°C to DIN EN 1107–2	longitudinal: transverse:	≤ 0,5% ≤ 0,5%	+ 0,1 % + 0,2 %
Cold bending test at -30°C to DIN EN 1109 / DIN EN 495-5	no cracking		no cracking
Ozone resistance after 14 days in water to DIN EN 1844	Grade 0		Grade 0
Joints / Peel strength to DIN EN 12316-2 / Shear strength to DIN EN 12317-2		≥ 80N/50 mm ≥ 200N/50 mm	140 N/50 mm 570 N/50 mm
Water vapour diffusion resistance index (µ) to DIN EN 1931			approx. 58.000
Fire behaviour to DIN 4102, Part 1	B 2		B 2
Reaction to fire to DIN EN 13501, Part 1	Class E		Class E
Fire behaviour to DIN 4102, Part 7, and DIN EN 1187	resistant to flyi and radiating h		resistant to flying sparks and radiating heat
Fire Tests on Building Materials and Structures according to BS 476 Part 3 "External Fire Exposure Roof Test"	resistant to fire	2	resistant to fire
