

# VINYL Safetred Range

## Product Fact Sheet

### Tarkett's balanced choice

The Safetred range is part of Tarkett's choice of sustainable solutions. It is an integrated system that allows for balancing all the competing needs, while making choices that are truly sustainable and work together aesthetically.

January 2011

*Where we can use renewable,  
natural resources, we do*

### Better Raw Materials

The Safetred range is based on up to 42% natural raw material, such as salt and mineral fillers.

We use local suppliers as far as we can to reduce the environmental impact from transportation.

*Using fewer resources is good  
for the environment and the  
bottom line*

### Resource Stewardship

The Safetred range is produced in Lenham (UK). The factory applies an environmental management system (ISO 14001).

As for all Tarkett sites, the Lenham site is assessed from an environmental point of view by an external auditor every two years. No risks were identified in the Lenham site during 2009.

*We make floors that  
are healthier and safer*

### People Friendly Spaces

The Safetred range deliver valuable health, hygiene and welfare benefits:

- ▣ The Safety Clean X-treme Performance surface gives improved resistance to soiling and staining and ensures easy maintenance with a reduced need for water and chemicals.
- ▣ Low VOC emissions – 350 µg/m<sup>3</sup> at 28 days – more than 2.5 times below demands in European Standard (1000 µg/m<sup>3</sup>), contributing to good indoor air quality.
- ▣ Incorporates a biostat for anti-bacterial properties that support good hygiene.
- ▣ High slip-resistance properties (R10 to R11) reduce the risk of slips, trips and fall injuries and provides sustainable slip resistance throughout the flooring's service life.

*We use more recycled  
content at the start and recycle  
more product at the end*

### Reuse and Recycle

The Safetred range contains up to 60% post-production recycled content.

ISO 14001 certificate n°XXXXXXX | ISO 9001 certificate n°XXXXXXX
